

HEALTH NUTRITION & WASH

Transforming Health Systems for All

Transforming Health Systems for All

Accessible and affordable healthcare is the cornerstone of a healthy, productive, and fulfilling life. Yet, in many developing countries, access to essential health services, balanced nutrition, clean water, and basic sanitation remains a pressing challenge, particularly for poor and marginalised communities.

We believe that targeted investments in **health, nutrition, water, sanitation, and hygiene (HNWASH)**, especially for **the underserved populations**, can transform lives and generate sustainable impact. Aligned closely with the **Sustainable Development Goal (SDG) 3 (Good Health & Well-being)**, our approach is a commitment to building **resilient health systems** capable of delivering **affordable, high-quality care for all**.

In partnership with National and State governments, development agencies, civil society organisations, private sector actors, and other stakeholders, we **strengthen health systems, improve supply chains, implement digital and AI-driven health solutions, and promote social and behaviour change**. We address **healthcare financing gaps** and work across the continuum of care **from reproductive, maternal, newborn, child, and adolescent health, to non-communicable diseases (NCDs), communicable diseases** such as HIV, TB, and COVID-19, **pandemic preparedness**, and emerging threats like **antimicrobial resistance**. By integrating nutrition and WASH interventions with **innovative, technology-enabled solutions and One Health approaches**, we aim to create healthier and more equitable communities where everyone has the opportunity to live, grow, and thrive.

What We Do

In Health Sector, we provide large-scale support to implement sector-wide approaches as well as stand-alone policy reviews, strategy development, and MEL services.

Technical Areas

- RMNCH+A
- Non-Communicable Diseases
- One Health and Global Health Security
- Communicable Diseases
- Nutrition Improvement
- Water, Sanitation and Hygiene

Health System Strengthening

- Procurement and SCM
- HR for Health
- Disease Surveillance and Diagnostics Infrastructure
- Public Financial Management
- Public Private Partnerships

Community Engagement

- SBCC and IEC
- Participatory Learning Approach
- Human Centric Design
- Behavioral Economics
- Equity and Gender Responsive Planning

Innovative Financing

- Insurance and Loan Products
- Development Impact Bonds
- Blended Finance Solutions
- Risk and Advance Market Guarantees
- Social impact funds

Innovation and Technology

- Med-Tech and Bio-Tech Solutions
- Tech Upgradation and Process Automations
- Rapid and POC Diagnostics
- Digital Health
- AI Based Solutions

The Royal Norwegian Embassy - Norway India Partnership Initiative (NIPI)

2016-2018 (March), 2019 (July)-Ongoing

Established in 2006, NIPI was born out of an agreement between the Governments of Norway and India towards sustainable efforts to reduce maternal, newborn, and child (MNC) mortality in India.

Project Type: Technical advisory and implementation support

Over the years, NIPI has provided strategic, catalytic, and innovative support to India's National Health Mission (NHM) by testing scalable interventions in four high-focus states of Bihar, Odisha, Madhya Pradesh, and Rajasthan and the Union Territory of Jammu and Kashmir. We have been implementing the project since 2016-2018, and again from 2019.

The three objectives:

INNOVATE

Demonstrate innovative approaches to strengthening the health system for Sexual, Reproductive, Newborn, Child, and Adolescent Health.

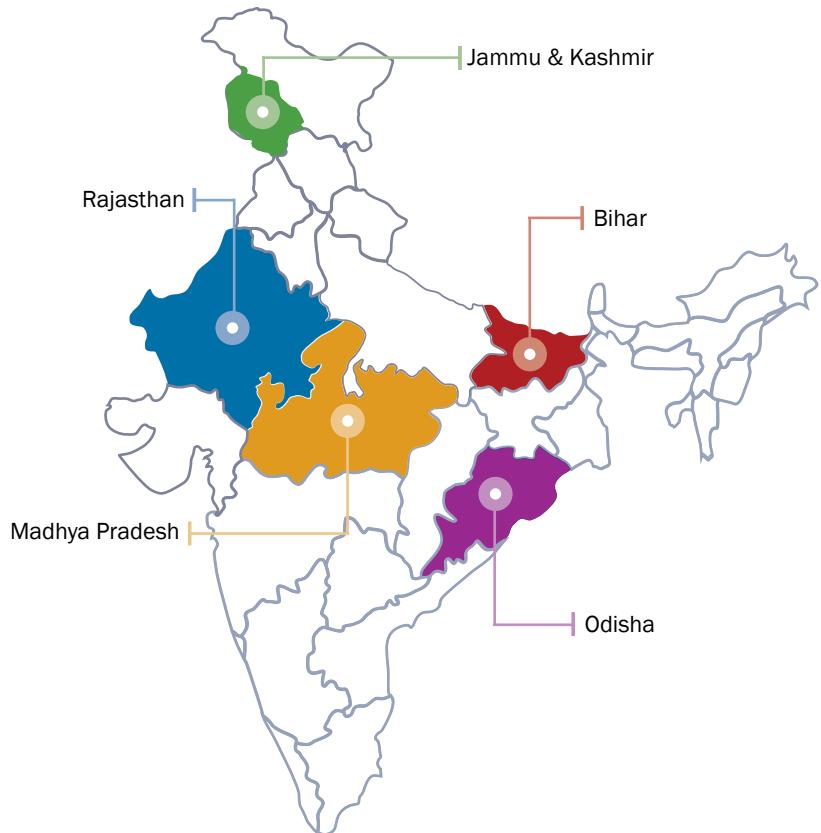

REPLICATE & SCALE

Provide technical assistance to scale up NIPI and NHM to demonstrate innovative practices in RMNCAH (Reproductive, Maternal, Newborn, Child, and Adolescent Health) and to ensure institutionalise of state innovation hubs.

COLLABORATE

Foster institutional collaborations on Digital Public Health Goods in RMNCAH.

IMPACT

State Health Societies – Support for strengthening various health programs of NHM.

25+ policy documents, guidelines, and training manuals developed.

7,00,000+ newborns, infants covered.

5,000+ mothers covered.

40,000+ health functionaries trained with support from the Government of India.

10 out of 11 innovations of NIPI scaled up by the Government of India.

Multi-donor | Sustainable Access to Markets and Resources for Innovative Delivery of Healthcare (SAMRIDH), India 2015 - 2025

SAMRIDH blends commercial capital with public and philanthropic funds to overcome barriers to private investment in market-driven health solutions, expanding access to affordable and quality healthcare for the vulnerable population.

Project Type: Technical advisory and implementation support

The initiative mobilised a capital pool of \$300 million to offer grant and debt financing provisions to healthcare enterprises and innovators, to augment the production and supply of high-impact health solutions for COVID-19. This was complemented by strong technical assistance and business advisory components to enable enterprises to make process and product improvements, navigate policy regimes, and build sustainability strategies for a long-term impact.

IMPACT

 **90+**
Solutions Supported

 **\$ 24+**
Million Deployed

 **4,200+**
Health Facilities

 **\$ 370+**
Million Leverage
Estimated

 **45+**

Adaptive Impact Measurement and Learning for CDC Plus businesses as they navigate the Covid-19 Crisis 2021-2022

It was estimated that Covid-19 would result in at least US\$220 billion in losses in developing countries, with the impacts in Africa and Asia expected to be especially damaging. The impact on businesses was acute, forcing them to deal with unprecedented financial and operational stress. In response, CDC Group's technical assistance facility, CDC Plus, launched two new facilities – the 'COVID-19 Business Response Facility' and the 'COVID-19 Emergency Technical Assistance Facility' – to support up to 100 businesses it currently invests in to better respond to the pandemic and its effects, reaching an estimated minimum of 300,000 underserved people at this time of need.

IPE Global-subsidiary Triple Line worked with both facilities to support learning, impact measurement and management.

Consultancy Services to Support National and County Level Nutrition Resource Allocations, Budget Analysis and Expenditure Tracking, Kenya

2002-2003 to 2015-2016

We were responsible for documenting national level financial tracking, analysis and validation of financial resource allocations and expenditure for nutrition from the FY 2002-03 to 2015-16. We documented process comparing allocations to the actual expenditure and county level financial tracking and analysis for nutrition. We produced financial information packs and guidance note for nutrition budget tracking; and refined the financial tracking tool for nutrition and developing a user manual for application.

USAID | SAMVEG: Systems Approach for MNCH Focusing on Vulnerable Geographies, India 2020 - 2025

Aiming to fill the critical gaps in the health sector, SAMVEG encouraged innovations, scale-up, and sustenance of interventions to improve maternal, newborn, and child health (MNCH) outcomes in identified vulnerable geographies of India. We supported monitoring and addressing bottlenecks for MNCH delivery in Jharkhand, Uttarakhand, and Madhya Pradesh. We also enhanced the capacity of state and district, public and private sector stakeholders to provide quality MNCH services.

IMPACT

3.5 million+ pregnant women and **3.1 million+** infants given equitable access to MNCH services.

13 million+ children (under the age of 5) benefited from the scale-up of MNCH good practices.

Project Type: Technical advisory and implementation support

STRATEGIC OUTCOMES

OUTCOME 1

Enhanced institutional capacity of Public and private sector networks in vulnerable geographies (AD)

OUTCOME 2

Responsive innovation implementation Models established in ADs

OUTCOME 3

Health system capacity strengthened to improve access and quality of MNCH services

Regional workshop on Strengthening Capacity for Short Programme Review of RMNCAH Programmes in Colombo, Sri Lanka (2024).

We have established several innovation implementation models in ADs: (1) Counselling for ANC, Readiness for birth and strengthening Essential newborn & child health care practices (CARE), (2) Strengthening VHSND through Integrated ANC & Early Childhood Development (ACE), (3) Quality Upgrade for Improving Accountability & Community Knowledge (QUICK), (4) Appropriate use of Carbetocin Room Temperature Stable (RTS), (5) Use of CPAP device for management of Respiratory Distress in neonates, and (6) Management of PPH with focus on UBT.

Conduct Child Protection System Mapping and Assessment, Bangladesh

2018-2019

The primary objective of this assignment was to undertake a thorough mapping and assessment of country level comprehensive child protection systems, laws, policies, services and procedures and capacities in place and to identify obstacles and opportunities in enforcing these laws and policies, especially in reaching vulnerable and excluded groups in Bangladesh.

We identified and analysed major strengths, weaknesses, gaps and opportunities in the current system; developed an analysis of information on the quality of services, coordination, measures and monitoring systems; assessed the government agency's perception, capacity and ownership to enforce the children's act which if properly resourced would contribute to strengthening of the child protection systems.

Resolve to Save Lives (RTSL) | Swasthya Sankalp: A Holistic Approach to Hypertension and Diabetes Management, India 2024 - 2025

Launched in Gujarat, Maharashtra, and Karnataka, the project aims to strengthen CPHC services for effective hypertension and diabetes care, tackling India's high Non-Communicable Diseases (NCDs) burden.

We have implemented several critical interventions to strengthen hypertension and diabetes management, focusing on improving supply chain management, maintaining drug registers, conducting eAushadhi-based stock analysis, and accurately estimating drug requirements. We conduct regular NCD programme reviews, integrating key metric indicators and developing factsheets with district rankings. To strengthen the use of the NCD portal, we provide advocacy and hands-on support for real-time data entry, population and ABHA seeding, routine data analysis, and timely resolution of zero-data entries.

Project Type: Technical advisory and implementation support

IMPACT

Detailed Baseline Assessment Report to evaluate existing landscape.

793 Medical Officers and 2,964 Community Health Officers trained.

Training sessions and on-the-job support focusing on blood pressure measurement protocols.

200 supportive supervision visits conducted from October 2024 to April 2025.

Asian Development Bank (ADB) | Urban Primary Health Care Sector Development Program, Bangladesh 2009-2010

The program improved health and sanitation in six major city corporations of Bangladesh, benefiting over 10 million people. It aimed to reduce child mortality, curb disease prevalence, and enhance urban quality of life while advancing national MDGs.

Our firm provided leadership in municipal solid and medical waste management, developing national guidelines, medical waste models, and designing critical infrastructure such as landfills, transfer stations, and treatment facilities.

USAID | Young Adults for Accessible, Respectful, and Inclusive Reproductive Health Initiatives (YAARI) 2023 - 2025

YAARI was conceptualised to shift the focus of India's Sexual and Reproductive Health (SRH) and Family Planning (FP) agenda from numeric targets to quality, choice, dignity, and empowerment, especially for adolescents and marginalised communities.

Project Type: Technical advisory and implementation support

Implemented across 11 districts in Jharkhand, Madhya Pradesh, and Chhattisgarh, with a Learning Lab in Delhi to showcase scalable interventions, YAARI engaged key national ministries (MoHFW, MoYAS, MoWCD, MoSDE) to ensure strategic alignment with India's FP2030 agenda.

IMPACT

- **Youth Health Network (YHN)** initiated by mapping 300+ public and private providers and registering 120+ through a digital platform
- **National Alliance for Youth and Adolescents (NAYA)** conceptualised
- **YAARI Progressive Web App (PWA)** conceptualised
- **Innovative financing mechanisms, impact bonds for healthy pregnancy** drafted
- **Adolescent participation** through storytelling and gamification
- **Health facility responsiveness** improved via barrier mapping and provider orientation
- **SRH integration into disaster response** with state National Health Mission (NHM) teams
- **Youth Resource Centre (YRC)** emerged as a dynamic knowledge hub offering for youth

Review of National Technical and Operational Guidelines under Family Planning 2025

Considering the rapidly evolving global landscape of family planning (FP) policies, technologies, and demographic needs, updating national FP guidelines periodically is essential. The "Review of National Technical and Operational Guidelines under Family Planning" was initiated to align existing frameworks with the latest global evidence, WHO recommendations, and national priorities, especially those linked to the FP2030 Partnership and SDG 3.

Project Type: Technical advisory

The review covered 20 technical, techno-managerial, and community engagement guidelines across five domains: accessibility, relevance, quality assurance, adaptability, and resilience. A secondary review was conducted with input from national experts via a structured questionnaire, yielding domain-specific scores followed by primary data collection through stakeholder consultations in six priority states, including Bihar, Delhi, Karnataka, Meghalaya, Uttar Pradesh, and West Bengal.

An advisory group meeting held in New Delhi on March 21, 2025, brought together over **40 subject-matter experts** to validate findings and propose policy recommendations based on relevance, scalability, feasibility, and acceptability criteria. The recommendations broadly emphasised **enhancing inclusivity, standardisation, youth engagement, and readiness of FP services through updated, user-friendly, and context-sensitive guidance tools**.

DFID | Ethiopia Safe Space Programme (ESSP), Ethiopia

2016-2017

The project contributed to improved personal, social, health, safety, education, and financial outcomes for 2,000 adolescent girls in Amhara and Oromia regions of Ethiopia – building girls' confidence, skills and knowledge as they progress through adolescence. ESSP was a pilot programme designed to test an approach for national scaleup. ESSP contributes to achievement of SDG-5 'Achieve gender equality and empower all women and girls'.

We completed the design of the programme, with the Federal Government of Ethiopia (GoE), (MoH, MoE, MoWCA) and other stakeholders, and developed an implementation plan for a nationwide Safe Spaces programme.

Amref Health Africa | Health Systems Advocacy Partnership Project for SRHR, HRH & Family Planning, Kenya

2016

We undertook a baseline study for Amref Health Africa to support its regional agenda on strengthening Human Resources for Health (HRH) and Sexual and Reproductive Health (SRH) medicines and commodities. The study aimed to inform government adoption of effective, locally relevant policies aligned with international standards.

We developed the survey methodology, work plan, and detailed budget; conducted a desk review of project and policy documents; and prepared a comprehensive implementation plan to guide survey execution under the Health Systems Advocacy partnership.

World Bank | Developing a Strategy and Management Framework for Human Resource for Health, under ASSIST Project, Assam

2023 - 2026

The Government of Assam is implementing ASSIST to strengthen healthcare management and service quality across the State.

Project Type: Technical support

Assam aims to accelerate progress in improving its citizens' health indicators through this project by prioritising strategic HRH (Human Resource for Health) interventions and capacity building aligned with the State's needs, changing disease burdens, and population dynamics. We provide technical assistance to the State for policy and strategy planning, systems strengthening, and management.

Policy and Strategic Planning

- Analysing existing HRH policies and data to identify systemic challenges.
- Formulating an overarching, evidence-driven HRH Strategy and Management Framework for the State's health department.
- Advising stakeholders on public health workforce policies, setting the research agenda, and translating findings into actionable reforms to uplift Assam's HRH.

Institutional Performance Review

- Reviewing the operational efficiency of health directorates/institutions to guide policy reforms.

Systems Strengthening and Management

- Developing/integrating HRH management information systems for evidence-based decision-making.
- Conducting a comprehensive HRH enumeration exercise across the health workforce, facilities, and institutions to enable effective planning, distribution, and forecasting.

The GAVI (Global Alliance for Vaccines and Immunisation) Alliance | Gender-Responsive Technical Assistance for Immunisation in Ethiopia | 2024-2026

We provide comprehensive gender-specific technical assistance in Ethiopia to support the design, implementation, and monitoring of gender-responsive and transformative immunisation programs under the GAVI grant cycle. Working at both federal and regional levels (Oromia and Afar), the initiative aims to tackle gender-based barriers to immunisation, improve equitable coverage, and strengthen local capacity for sustainable gender integration.

Government of Kenya/ Kreditanstalt für Wiederaufbau (KfW) | End of Phase II Evaluation and Baseline for Phase III of the OBA Program, Kenya | 2012

The Reproductive Health Output-Based Aid (RH-OBA) program in Kenya aimed to reduce maternal and neonatal mortality by improving access to quality reproductive health services for the poor.

Our firm evaluated Phase II (2008–2011) and conducted the baseline for Phase III, expanding to Kilifi and Kitui. Using OECD-DAC criteria, the evaluation assessed program relevance, efficiency, effectiveness, and sustainability, while identifying lessons and improvements. Baseline surveys in Nairobi, Kiambu, Kitui, Kisumu, and Makueni generated robust data to track future program performance.

World Bank | Technical Support Service for Program Management Unit for SRESTHA, Gujarat | 2023 - 2028

An initiative by the Department of Health and Family Welfare (DoHFW), Government of Gujarat, SRESTHA-G (Systems Reforms Endeavours for Transformed Health Achievements), aims to improve quality, equity, and access to comprehensive primary healthcare services.

We are supporting the programme design and implementation across four key result areas:

- Improved Comprehensive Primary Health Care (CPHC)** including RMNCAH, Non-Communicable Diseases (NCDs), and mental health.
- Improved integrated health service delivery models for adolescent girls** through improved health, nutrition and livelihood service provision and utilisation.
- Strengthened disease surveillance and early detection of outbreaks and response** through hospitalisation and mortality surveillance, Logistics Management Information System, and the one health approach.
- Strengthened Quality of Care (QoC)**, governance, accountability, and citizen engagement.

Project Type: Program Management Unit (PMU)

SAPCAR: ToI Article
Read More

IMPACT

Additional 1414 Ayushman Arogya Mandir (AAM) facilities providing 7 service packages.

378 AAMs and 3 secondary hospitals received NQAS certification, and 3 MCHs have received NABH accreditation.

90% Population-Based Screening achieved for NCD.

Health System Research strategy framework, Data Quality Improvement Program (DQIP), and Performance Monitoring Framework (PMF) implemented.

State Action Plan for Containment of Antimicrobial Resistance (SAPCAR) operational plan developed & adopted.

Multi-Donor | Cash Transfers for Orphans and Vulnerable Children (CT-OVC) Programme, Kenya 2017

Implemented by the Ministry of East African Community, Labour and Social Protection (MEACLSP), Government of Kenya with financial assistance UNICEF, The World Bank, DFID and Sida, the Cash Transfer for Orphans and Vulnerable Children (CT-OVC) is the largest social protection programme in Kenya. The programme aimed to provide a social protection system through regular cash transfers to families living with orphans and vulnerable children (OVC) to encourage fostering and retention of such children within their families and communities thereby leading to human capital development.

DoHFW, Government of Meghalaya/World Bank | PMA to Support Implementation of Meghalaya Health Systems Strengthening Project (MHSSP)

2021 - 2026

MHSSP aims to improve health system performance and the quality of services through strategic investments in programme management, health insurance, and service delivery.

As the Project Management Agency (PMA), we have been providing comprehensive programme management and monitoring support, assistance with procurement and financial management processes, and technical expertise. We deliver techno-managerial support to the Department of Health and Family Welfare to implement health system strengthening initiatives across the State. Additionally, we assist the State government with establishing a digital health information system to enhance data-driven decision-making and service delivery.

Project Type: Project Management Agency (PMA)

KEY MILESTONES

- Used assessment frameworks (PHC, CHC, DH, District DMHO, Directorates, MHIS) and operational module to implement IPA, and support pilot programs.
- Developed a comprehensive MHSSP website and sub-systems like PPMS (Project Performance Monitoring System).
- Started a Bio-medical Waste Management System in healthcare facilities in 2 districts.
- Set up a tendering and procurement management system at MHSSP and trained the point person and team in procurement, tendering, and contract/vendor management.
- Developed the 'Detailed Operational Guidelines' for Meghalayan Medical Drugs and Services Limited (MMDSL) operation and helped create 'Standard Specifications' for medical instruments, equipment, furniture, and consumables.
- Prepared a detailed gap assessment for upgrading six nursing schools and created a "Nursing Vision 2025" document.

DMFT | Programme Management Unit (PMU) for District Mineral Foundation Trust (DMFT), Odisha | 2022 - 2025

The PMU functions as the DMF Resource and Function Hub, identifying critical gaps in mining-affected areas to prioritise action and evaluating proposals submitted for DMF support. It plans, implements, and monitors approved projects, ensuring convergence with line departments for coordinated efforts.

As the PMU, we promoted innovative solutions through pilot interventions and adapt best practices to the district context. We have demonstrated the impact of DMF activities through communication, prepared policy briefs, and documented lessons learned. Additionally, we undertook capacity building, provided technical assistance to DMF governing bodies, trained deployed resources, and carried out assignments as directed by the Competent Authority.

Project Type: Programme Management Unit (PMU)

SUCCESS STORIES

- **Upgradation of District Headquarters Hospital:** Added a 100-bed ICU and trauma care centre, advanced surgical facilities, and virtual consultation services. Developed senior citizen and PWD-friendly infrastructure, day rooms, and specialised critical care units.
- **Child-friendly NRC Facility:** Built a mother-child co-stay ward with play and counselling areas, dedicated nursing stations, in-ward kitchen for feeding demonstrations, and attached sanitation facilities.
- **Advanced Rehabilitation Centre (ARC):** Strengthened services through staff training in prosthetics and rehabilitation, and introduced tech-enabled prosthetic, orthotic, and therapy services.

National Capital Region Planning Board (NCRPB) | Preparation of Functional Plan for Health, Delhi-NCR | 2023 - 2025

NCRPB is preparing Functional Plans for NCR for the perspective year 2041 with respect to various aspects as per the requirement of its draft Regional Plan-2041 proposals, including functional plan for health. The Functional Plan preparation exercise includes studies, collection of primary and secondary data for required sector, data analyses and interpolation, formulation of strategies, proposed interventions, and identification of projects at regional, sub-regional and local level, as deemed fit, within the coverage and overall framework of NCR RP-2041. The Functional Plan shall include the identification of associated infrastructure and other investment projects for the NCR.

The outcome of this engagement will be a gap analysis and a set of strategic recommendations to enhance quality of care, which will be included in the health component of the Regional Plan 2041.

Project Type: Technical advisory and implementation

MILESTONES

- Preliminary landscape analysis and detailed assessment of health scenario and status in NCR.
- In collaboration with the NCRPB, Ministry of Housing and Urban Affairs, Government of India, successfully facilitated a Stakeholder Consultation workshop focused on strengthening healthcare services in the NCR. The consultation yielded valuable recommendations and a roadmap for finalising the Health Sector Functional Plan for the NCR.

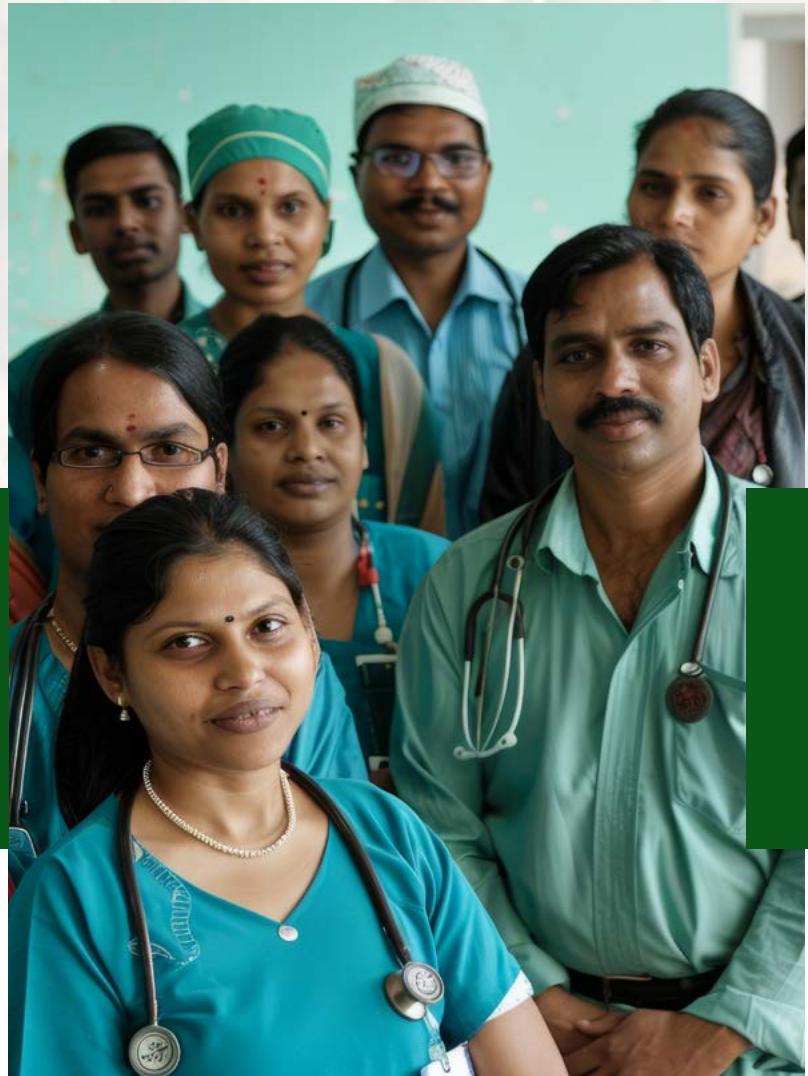

MoHFW/World Bank | Establishing State Technical Support Unit (STSU) in the State of Tamil Nadu | 2021 - 2025

To support the Central Tuberculosis Division's (CTD) 'Programme Towards Elimination of Tuberculosis', the World Bank established STSUs across nine priority states to expand coverage and improve the quality of TB control interventions.

We established STSU in Tamil Nadu to support in engaging the private sector partners to work towards eliminating TB. We undertook:

- 1. Contract Management:** Onboard agencies and manage the contract operationally.
- 2. Monitoring and Evaluation:** Monitor the progress of contracted agencies on results-based outputs and optimise the use of Nikshay to review data for action.
- 3. Capacity Building and Technical Support:** Dipstick surveys/qualitative assessments to review the results of contracted agencies and provide recommendations for payments to agencies.
- 4. Innovative Financing:** Implementation and technical support provided to the State by donors or philanthropic institutions.

Project Type: State Technical Support Unit (STSU)

IMPACT

- Assisted 22 districts in planning, implementing, and monitoring Nikshay Shivir activities.
- Supported State TB cell in training, regular performance and death analysis, TN-KET data analysis, and other state-specific priorities.
- Engaged 11 government departments to drive convergence critical to the State's goal of ending TB by 2025.
- Initiated and expanded CSR engagement with 5+ companies.
- Comprehensive TB data analysis, including private sector notification trends, treatment outcomes, and comparative assessments for 2023–2024.
- Provided end-to-end support for Direct Benefit Transfer (DBT) processes, including handholding on Nikshay and PFMS workflows and on-the-spot solutions for district-level DBT issues.
- Analysed and verified 100,000+ blocked beneficiary payments, preparing updated records for resolution by the CTD.

Long Term Agreement for Providing Technical Support towards Financial, HR and Logistics Management for SMNet Programme, Uttar Pradesh and Bihar

2023-2026

The Social Mobilisation Network (SMNet) is a program communication network established to ensure that all children are getting vaccinated against Polio (every round). The scope of the SMNet has expanded to include a larger scope for routine immunisation and other convergent interventions.

We support UNICEF to conduct regular oversight on recruitment and deployment of Social Mobilizers (SMs) in the high priority blocks/planning units. We provided managerial support for about 922 Consultants.

Outsourcing and Administration Support to the World Health Organization

Outsourcing Recruitment, Administration, and Pay-rolling to Support the India Hypertension Control Initiative (IHCI) 2018-Ongoing

138 consultants - Cardiovascular Health Officers (CVHOs) and Senior Treatment Supervisors (STS)

Outsourcing of Day-to-Day Administration and Pay-rolling of National TB Elimination Program (NTEP) Consultant's Network 2021-2022 & 2023-Ongoing

170+ medical and non-medical NTEP consultants

Technical support to Government of India (GoI) for Midwifery initiative through a Central Coordination Unit (CCU) 2020-2024

Positioning of highly skilled technical professionals to MoHFW, GoI to strengthen their capacities of the CCU for implementation of midwifery interventions

Hiring and Administrative Management of Rapid Response Team members (RRTs) to Support COVID-19 Vaccine Introduction 2021-2022 & 2023-2024

50 RRT consultants/medical personnel

Administering Financial, HR and Logistics Management Services of Field Monitors (FM) Deployed for National Polio Surveillance Program (N PSP)

2013-2024 (in multiple phases)

1700 Field Volunteers based in over 300 locations pan India

AWARDS & RECOGNITION

2022

P3 Impact Award to **SAMRIDH** at Concordia Summit for exemplary public-private partnerships

5th Commonwealth Digital Health Award to **Decision Support System (DSS)** by NIPI under Maternal and Neonatal Health

2024

Best Health Care CSR Project Award to **SPARSA Project**

2025

2025 BRICS Solution Award to **SAMRIDH Healthcare Blended Finance Facility**

2023

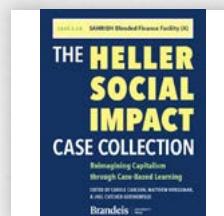

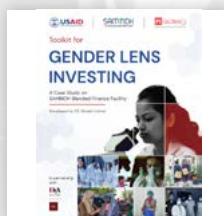

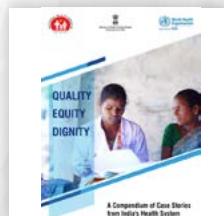

USAID-Supported SAMRIDH and IPE Global become Founding Members of **G7 Endorsed Impact Investment** Initiative for Global Health

SKOCH Silver Award for District Governance to **“Growing with Grace”**, led by the Angul District Administration

SKOCH Order of Merit Award to **NHM, J&K**, developed by NIPI **for the use of Open Data Kit (ODK) app**
